The Second Annual Graduate School Commencement Ceremony August 19, 2001

When osteopathic schools were forming throughout the country in the 1890s, two students at the Northern Institute of Osteopathy in Minneapolis, Mason W. Pressly and Oscar John Snyder, targeted Philadelphia as a future home for an osteopathic medical college. While the city of brotherly love had a rich history of medicine, it had but one “osteopathist” by the time Pressly and Snyder graduated in 1898 and 1899, respectively. The two DOs followed through with their vision, incorporating the Philadelphia College and Infirmary of Osteopathy on January 24, 1899. The first PCIO degree was awarded to a transfer student; the first PCIO “class,” comprised of two students, graduated in February 1900 from the fledgling college, then located at 21 South 12th Street.

The college prospered and moved through a number of sites in its first century, including 1715 North Broad Street, 832 Pine Street, 19th and Spring Garden, 48th and Spruce, and finally, the City Avenue campus. During this growth period, the medical curriculum expanded, osteopathic research was initiated, and clinic and hospital services grew rapidly as the medical school’s student body and faculty increased dramatically.

After nearly a century of training physicians, PCOM launched its first graduate degree program, the Master of Science in Biomedical Sciences, in 1993. The first five graduates in June 1995 marked the beginning of yet another period of growth for the college - the development of a graduate school. Six years later, more than 250 graduate students are enrolled in PCOM’s graduate degree programs.

These students pursue studies at the masters level in biomedical science, clinical health psychology and physician assistant studies. Doctoral-level study is offered in clinical psychology for professionals seeking the Psy.D., respecialization in clinical psychology, or a certificate of advanced graduate study. Through innovative distance learning methods and modern telecommunications technology, PCOM extends its psychology program to off-campus classes at East Stroudsburg University and the Dixon University Center in Harrisburg.

The faculty and administration are pleased that you are with us on this important day in our academic year, as we celebrate our graduate students, their research and their future in the academic and professional community.

Commencement Speaker

Brian McDonough, M.D.

Brian McDonough, M.D., has an extensive background in medicine and broadcasting. His ability to translate health information for a lay audience has attracted a national audience. He is a regular lecturer in PCOM's public health course and has trained many PCOM medical graduates through his residency program in family medicine at St. Francis Hospital in Wilmington, Delaware.

Dr. McDonough's syndicated medical reports and health talk show can be heard on more than 500 radio stations in all 50 states. He can be seen three times each week on FOX television and has served as medical editor for Health Ink & Vitality Communications for more than a decade. He has written three books and has received three Emmy Awards for his work in the media.

Dr. McDonough is Clinical Associate Professor of Family Medicine and Community Health at Temple University School of Medicine, where he graduated in 1985. During the mid 90s, he served there as Vice Chairman of Family Medicine and Community Health.

He is the Associate Director of the St. Francis Hospital Family Practice Residency Program in Wilmington, where he maintains an active practice. Among his academic awards: the Sir William Osler Award for Teaching, the American Academy of Pediatrics Distinguished Service Citation and the Delaware Academy of Family Physicians Award of Achievement.
